

As a resident I honestly believe that Air one has impacted my family a great deal. There are no station other than Air 1 that provides a positive alternative attitude. If Air one were to be displaced by an LPFM broadcaster providing other programming instead of the positive music that Air1 offers it would be horrible. Not only is the music is positive but the dj's are blessed enough to give you incouragements to drive safely and make the best of what ever kind of day you have had or are going through. I believe Air-1 is in the public interest because there is not one song that they play that will include the following subjects in there songs like sex, drugs, violence, or anything that might lead a person to speed in traffic. Its important to me that my daughter that is 3 year old and repeats everything she hears that she may listen to a positive station and positive music. I will continue to support Air-1 for aslong as i am able to. God bless!
